

RINA Systems, LLC

Software Engineer Job Description

We are a dynamic team building the next generation e-Discovery product, looking for a full stack web developer to join our team. Technologies used are: Python, JavaScript, Html/CSS, Flask, Tornado, Node.js, Angular.js, Backbone.js, Celery, Redis, PostgreSQL, MongoDB.

Critical Skills:

- ✓ Knowledge of at least one of the scripting languages: Python, Ruby, JavaScript (Python highly preferred);
- ✓ Web development experience using HTML/CSS/JavaScript;
- ✓ Knowledge of web frameworks, MVC pattern, designing RESTful APIs and relational databases;
- ✓ Experience developing in a Unix/Linux environment;
- ✓ Experience with client-side MVC frameworks such as backbone.js, Angular.js and single-page web applications is a plus;
- ✓ Ability to quickly learn and use new technologies and interest in writing elegant code;
- ✓ Knowledge in *Machine Learning* and *Natural Language Processing* is a plus
- ✓ Experience writing multi-thread/multi-process/distributed programs is a plus

Bachelor's Degree in Computer Science, Information Science or a related field (M.S. preferred)

In addition, the Software Engineer will be expected to obtain necessary domain expertise in the area in which he/she contributes.

This is an excellent opportunity for professional growth and technical creativity in a casual work atmosphere. Our company is dedicated to the newest technologies in a low employee turnover organization.

The qualified candidate must be able to work and communicate with colleagues, management, and customers.

Medical and dental benefits start on the 1st day of employment and include employer contribution to premiums. 401K and disability benefits are offered as well.
